Medicare at age 76:

If you don't read this, and do nothing about it, don't complain when it affects you or your loved ones! This is the second Judge to have read the Obama Care document comments. More highlights of Nancy's "pass it and then find out what's in the bill"! Show this to everyone nearing or soon to near the age of 76. These are just a few of the things that we Seniors are going to have to deal with which started in 2014. Even far left Democrats will not like these.

MEDICARE AT AGE 76, IMPORTANT PLEASE READ - ANYONE WHO DOUBTS THIS IS TRUE CAN DOWNLOAD OBAMA CARE AND LOOK UP THE PAGES MENTIONED. THIS IS JUST THE BEGINNING.....THIS should be read by everyone, especially important to those over 75..... If you are younger, then it may apply to you or your parents soon.

Your hospital Medicare admittance has just changed under Obama Care.

******You must be admitted by your Primary Care Physician in order for Medicare to pay for it! If you are admitted by an emergency room doctor, it is treated as outpatient care where hospital costs are not covered.**** This is only the tip of the iceberg for Obama Care.**

Just wait to see what else went into effect in 2014.
